Task 3542

5/10/2010

Dear Mr. Baker;

I am writing concerning my Uranium mine West of Green River in Emery County, as You know UDOGM has approved the NOI as submitted by Carnotite LLC last year (S/015/0097). To update you on the status of the mine, all permits have been granted and at present the BLM is conducting the Environmental Assessment of the mining area. The White Canyon Uranium mill at Blanding, Utah has temporarily ceased buying Uranium ore. Mining will not begin until after they have reopened and the price of Uranium has begun to increase to 2007 levels.

Recently I read an article in the Salt Lake Tribune concerning UDOGM environmental awards being given to several industrial companies. One of the awards was to Anadarko Petroleum for cutting their water consumption for dust control on their haul roads by 70%. I am interested in knowing the particulars in this reduction for possible use on our haul roads when mining begins. Please give a copy of this letter to someone at UDOGM who is working on this problem so that they can supply the details to me.

Thank You,

Ted Thompson
